### The National Matte Smelter.

A practical and simple method of matting sulphide ores, such as nickle, cooper, gold and silver ores. In localities where had ores and fuels are scarce and almost unattainable, our pyritic, water jacket Matte Smelter has been recognized with highly satisfactory results, and has been thoroughly tested on various pyratic, sulphide and arsenide ores, in capacity of 2 to 80 tons per day. It is the most practical, cheapest and simplest method of gold and silver ore matting and concentrating that is known today

It requires no extraordinary skill, no lead ores, the sincher after it is started. The sulphur in the ore is its natural fuel only, and its cost has no comparison with any other process of con-

That is why it is the only remedy with millions of families, and is everywhere extremed so highly by all who value good health. Its benedicial effects are due to the fact, that it is the one remedy which promotes internal cleanliness without debilitating the expans on which it nots. It is therefore all important, in order to get its beneficial effects, to note when you purchase, that you have the genuine article, which is manufactured by the California Fig Syrup Co. only and sold by all reputable druggists.
